FOCUS ON SCHOOL EDUCATION

CONSUMER CONNECT INITIATIVE

Back to School

While returning to the offline educational journey, there are specific crucial steps one must take to aim towards a safer tomorrow

Seema Dasgupta

In the past few months, the world of education has witnessed a significant shift in the way we approach learning. The pandemic has forced us to re-evaluate our educational systems and embrace digital learning as a viable alternative. However, as we look towards a safer tomorrow, it is crucial to take specific steps to ensure a smooth transition back to offline education. This involves a combination of safety protocols, hybrid learning models, and a focus on practical skills. The goal is to create a safe and effective learning environment that prepares students for the challenges of the future.

The pandemic has been a significant event for the world, with millions of lives lost and billions of people affected. The education system has also been severely impacted, with schools and colleges closed for months. This has led to a significant learning loss and a widening of the digital divide. However, it has also led to a re-evaluation of our educational systems and a focus on digital learning. This has led to a significant shift in the way we approach learning, with a focus on practical skills and a hybrid learning model. This involves a combination of online and offline classes, with a focus on practical skills and a hybrid learning model. This involves a combination of online and offline classes, with a focus on practical skills and a hybrid learning model.

EXPERT'S SPEAK

●● In the last few months, we have ensured that the teachers and all school staff members are vaccinated; thorough sanitisation of the school building and furniture is in progress. Initially, we would like to have a hybrid model of classes for the students for which we have installed Wi-Fi connections in our classrooms for taking online and offline classes simultaneously. Each child is expected to come to school on alternate days in the week following the schedule prepared by the school and circulated among the students. During the class hour, emphasis will be given on practical classes, evaluation of projects, assignments and doubt clearing in various subjects.
